

Congratulations on the news that you are expecting.

At Terang and Mortlake Health Service, we would be delighted to assist you in this exciting life event.

Terang and Mortlake Health Service has been birthing babies in conjunction with local GP/ Obstetrician services including Terang Medical Clinic for over 80 years. We are a Level 2 birthing centre, specialising in low risk pregnancies.

We have a reputation of providing safe, person centred birthing services, close to home.

Advantages of birthing in this facility include:

- **Booking in appointments at convenient times for families
(after hours appointments available)**
- **Increased access to family support whilst birthing in your local facility**
- **Increased options for length of stay in order to rest and master breast feeding etc.**
- **Continuity of care with midwives who will then visit you once you are discharged home with your baby (domiciliary visit).**
- **A welcoming environment for your birthing partner to be accommodated in the maternity suite**
- **A true team approach to birthing**

Terang & Mortlake Health Service currently has two GP/Obstetricians who look forward to sharing this journey with you.

Dr. Tim Fitzpatrick and Dr. Amsa Kishantha are both passionate about birthing babies in their local community and are on hand to answer any questions that you may have.

The other GP's at Terang Medical Clinic are all qualified to provide basic pre-natal care also.

Booking into the Health Service can be done by making an appointment with a midwife by calling 559 20222 at 20 weeks.

If anything changes in regards to the level of care that you require, we also have excellent referral pathways with South West Healthcare.

Thank you for considering to have your baby with us.
